

Release Notes Ermetix 0.3.0

May 2023

Improvements:

- Event detail dialog graphic improved, added repair dialog in the monitoring tab.
- Deselect on selected OS version slice in OS pie chart. Middleware for protecting only admin routes.
- MFA with Google authenticator. Improved data fetching for devices. Implemented simple Reseller logic.
- Dates displayed with web browser time zone.

Bug Fixes:

- Handled URL server Ermetix not correct.
- Handled redirect user in homepage when already logged in.
- Fix bug in pie chart when OS version is selected, and the events number goes to 0.
