ERMETIX

Unified Endpoint Management
Mobile Threat Defense
all in one

Feature Highlights

Unified Management

Cross Platform Enrollment

Thanks to the certifications obtained from Google, Apple, Microsoft and Samsung Knox, Ermetix is able to deploy a massive enrollment of devices (**Android, iOS, MacOS and Windows 10/11**) in a remote and completely automated mode.

Restrictions & Policies

Over **250 device restrictions and user policies** can be applied to the devices through the Ermetix web dashboard, which also allows you to create and manage policies and flows flexibly and quickly. All work profiles, including restrictions and policies, can also be scheduled on an hourly basis through the simple and powerful programming module.

Native Multi instance

Ermetix is a **native multi instance platform,** which can be provided in **SaaS mode or On Premise**. Its architecture it was designed and developed for an high scalable multi customer management for the **MSSPs needs** too.

Remote Screen View

Thanks to the Remote Screen view features you can take the **total control of the Android and Windows 10/11** devices remotely. It's the ultimate feature for the remote technical support.

SSO & Directory Sync

Ermetix can be directly connected to the **Azure, Google, SAML or Radius SSO** services and to **Azure AD, LDAP and Google Workspace** through Directory Sync.

Private Safe Repository

In this **protected area** you can upload **files, links, Public APPs** and **your own APPs.** They will be available in real time, only to the instance related devices.

Smart Workflow Management

Thanks to SWM engine you can **create and automate any kind of control and security Ermetix routine** and **processes**, in a very simple but powerful way.

Unified Security

Anti Malware Scan

Our own scan engine is able to detect and block in real time, all the most advanced threats such as **malware**, **trojan** and **ramsonware**, thanks to sophisticated algorithms combined with best-in-class knowledge base.

Hardening and security posture

Reduce the devices **attack surface** through specifics and fully customizable preset profiles which use more 200 restrictions available , improving the device **Security Posture Index** for **SASE** and **ZTNA** security approaches.

IOC Correlation Engine

The 10% of the cyber attacks , especially to mobile devices , are not detectable by anti virus because this kind of malware exploits "ZERO DAY" vulnerabilities. The Ermetix IOC (indicators of compromise) correlation engine is focused to detect and block this threats thanks to its amazing AI based on algorithm.

Anti Phishing

Check in real time the reliability of all the **URLs** delivered to the device, through Socials (**Telegram, Whatsapp, Facebook, Instagram** etc), eMail or typed in all the **browsers**, detecting and blocking the malicious ones.

SIEM SOAR Integration

All the SIEM and SOAR platform on the market are not designed to monitor and secure Android and iOS devices. Improve quickly your SOC with Ermetix platform integration to the most common SIEM and SOAR on the market , through our REST API and JSON presets.

Firewall

Ermetix smart firewall is able to manage and monitor both the incoming and outgoing devices data traffic. Furthermore, create different kinds of security policies to be applied.

In a complex world of mobile-first and remote-work, corporate mobile equipment, IoT, endpoints and personal devices play a crucial part in many organizations across industries. A diverse device ecosystem poses multiple challenges to IT teams when it comes to managing, troubleshooting and securing the fleets.

ERMETIX is the ultimate all-in-one solution to manage, monitor and protect mobile devices and endpoints from a single centralized console.

▼ **Maximized efficiency and productivity**

▼ **Centralized Multi Tenant Management**

▼ **Bullet-Proof Cybersecurity Suite**

▼ **Flexible Licensing for Limitless Scalability**

▼ **Third-Party Integrations**

▼ **Remote Assistance Made Easy**

▼ **Comprehensive Regulatory Compliance**

▼ **Certified for all Major Operating Systems**

Choose Ermetix

Improve Security Posture

Our "3 defense Lines" approach reduces to the lowest the risks of cyberattacks and threats to the fleets of mobile devices.

Reduce Complexity

An all-in-one platform with a single license that combines an extensive MDM feature-set with the capabilities of a powerful MTD solution. Save time, resources and money: choose Ermetix!

Increase Efficiency

Ermetix technology is designed by mobile security experts committed to provide the best-in-class product for any mobility challenge. Today's business is "everywhere": secure it with Ermetix.
